

Product Information:
LIQUIMATIC 33G
TRANSMISSION OIL

Description

Liquimatic 33G is an automatic transmission fluid blended from high quality mineral base oils and specially balanced additives. The product has outstanding resistance to high temperatures encountered in severe operating conditions, and protects all critical components from wear, rust and corrosion. This oil has been specifically designed to give smooth operation of automatic transmissions in all climates and under all work loads.

Applications

Recommended for use in all Ford automatic transmissions where a M2C 33G qualified product has been specified. Other transmission applications include Borg Warner, ITL (JCB) and certain Land Rover units. It is also recommended for use in fluid drives, torque converters, power steering units and hydraulic systems when an oil of this specification is required.

Performance Levels

Ford ESW-M2C33-G

Physical Characteristics

Colour	Red
Density @ 15.6 °C	0.871
Viscosity @ 100 °C, cSt.	8.17
Viscosity @ 40 °C, cSt.	44.69
Viscosity Index	159
Flash Point (Closed) °C	193
Pour Point, °C	-39
