

Product Information:

WORKSHOP PRO

ALL SEASONS SCREENWASH

Specially formulated high performance screenwash concentrate

Description

Workshop Pro All Seasons Screenwash is a specially formulated screen wash concentrate that is made for adding to water in vehicle washer bottles. It cuts through dirt and grime from roads and traffic leaving a clean and sparkling smear free windscreen.

The special formulation helps wiper blades glide smoothly over the screen and eliminates annoying judder. When used as recommended, Workshop Pro All Seasons Screenwash is suitable for all year round use and will prevent the washer bottles, pipes, and pumps from freezing at temperatures down to -25°C, and will also help prevent the icing of nozzles that are exposed to the icy blast of the slipstream.

Applications

Recommended for all windscreen washer systems on all vehicles including cars, vans, HGV's and PSV's. Workshop Pro All Seasons Screenwash is recommended for all year round use at the suggested dilutions shown below.

SEASON	SUMMER	MODERATE WINTER	SEVERE WINTER
Freezing Protection	-5 °C	-10°C	-25°C
Mixture	3 parts Water 1 part Screenwash	1 part Water 1 part Screenwash	Use neat

NOTE: Intermediate dilutions may be used to obtain the required protection. Increasing the screen wash concentration in extremely dirty conditions will increase the cleaning performance.

Physical Characteristics:

Appearance	Fluorescent Yellow Liquid
Relative Density @ 15.6°C	0.970
pH 25°C @ (Neat)	7.5
Refractive Index (% Brix)	12
